

IVEC 2020 Vacuum Electronics Conference

Exhibitor Prospectus

April 20-23, 2020 Marriott Monterey - Monterey, California

www.ieeeivec.org

What is IVEC?

IVEC was created in 2000 by merging the U.S. Power Tube Conference and the European Space Agency TWTA Workshops. IVEC provides a forum for scientists and engineers from around the globe to present the latest developments in vacuum electronics technology. IVEC is held every other year in the U.S., and in Europe and Asia alternately every fourth year. After a successful 2019 meeting in Busan, Korea, IVEC will return to its beautiful U.S. location in the city of Monterey, CA, in 2020.

What takes place at IVEC?

Technical presentations at IVEC range from the fundamental physics of electron emission and modulated electron beams to the design and operation of devices at UHF to THz frequencies; as well as theory and computational tool development; and active and passive components, systems, and supporting technologies. System developers will find that IVEC provides a unique snapshot of the current state of the art in vacuum electron devices. These devices continue to provide unmatched power and performance for advanced electromagnetic systems, particularly in the challenging frequency regimes of millimeter-wave and THz electronics. Plenary talks provide insights into the broad spectrum of fundamental physics, including the history, scientific issues, and technological applications driving the current directions in vacuum electronics research.

Who attends IVEC?

With technical co-sponsorship from the IEEE Electron Devices Society (EDS), the conference provides a forum for international scientists and engineers who participate to discuss and discover the latest developments in vacuum electronics technology.

Why Exhibit and Sponsor at IVEC?

At IVEC 2020, you can market and sell your products, build your brand, and expand your customer base. Your exhibit puts your company at the epicenter of the world's most comprehensive conference designed for the development and advancement of the technology, knowledge, products, and devices pertaining to vacuum electronics technology. At IVEC, you can expand or launch your business into international markets right from your booth

IVEC 2020 offers just what your company wants, including:

Current knowledge, marketing support, quality contacts customers, sales, success

Five Business Activities Attendees Undertake in the IVEC Exhibit Hall

- 1.** See and obtain information on new products, emerging technologies, and solutions to challenges
- 2.** Identify specific needs for new or different technology
- 3.** Compare alternatives (performance/specs/ costs/etc.)
- 4.** Meet with current suppliers
- 5.** Research and find new suppliers
